Job Title:	PHP Developer (Intermediate)
Reports to:	Technical Development Manager
No of Reports:	0
Location:	
Salary:	Up to £30,000 + Benefits

Purpose of role:

Our PHP developers contribute to improvements, new features and maintenance of our Symfony 3/4/Flex based web applications and services.

Working as a member of our agile development team, new features are written using Object Oriented (OO) PHP, MySQL, HTML/Less CSS/JavaScript in an environment that encourages learning and the advancement of your technical skills as a developer.

You will be based in our collaborative, open environment at our Head Office.

Duties & Responsibilities:

- Build and maintain Wren's custom built, cutting edge applications (Symfony 3/4/Flex Based)
- Write clean code that is clear and understandable by others
- Contribute to project specifications and estimations
- Contribute to all phases of the development lifecycle
- Work with senior developers, business stakeholders and development team to understand the initial scope for a new project

Experience & Knowledge:

Essential

- At least 2 years' experience in creating and maintaining object oriented PHP7 based systems
- An understanding of the MVC approach to development
- Experience of working with MySQL 5+
- Demonstrable knowledge of web technologies including HTML, CSS, JavaScript and Ajax
- Experience of using version control systems (such as Git) as part of a team
- Excellent communication skills – must be able to describe technical issues to a none technical audience
- Highly proficient in both spoken and written English
- A passion for adhering to coding standards and clean code

Desirable

- A working knowledge of the Symfony 3, Symfony 4 or equivalent framework
- A working knowledge of the Doctrine ORM
- Experience in creating and maintaining RESTFul APIs.
- Experience of automated testing (e.g. PHPUnit, Selenium, Behat)
- Knowledge of design patterns, with practical experience of implementing them
- Experience of agile project methodologies (and its impact on iterative design)
- Experience of working in a continuous integration environment
- Familiar with Linux or Mac OS

- Has previously worked for a retailer / understands retail processes
